Printed Page: 1 of 1

BTECH (SEM VI) THEORY EXAMINATION 2023-24 COMPUTER NETWORKS

TIME: 3 HRS M.MARKS: 100

Note:	1. Attem	nt all S	Sections	If rec	mire ar	ny missing	data:	then	choose	suitably
11016.	1. I tttciii	pi an L	occuons.	11 100	junc ai	ry minosing	uata,	uicii	CHOOSE	sultably.

SECTION A

1. Att	tempt <i>all</i> questions in brief. $2 \times 10 =$	= 20
a. V	What are the applications of Computer Networks?	02
b. V	Vrite advantages and disadvantages of Mesh Topology.	02
c. D	Define fixed and variable size framing.	02
d. E	Explain the working of Bridge.	02
e. D	Define delivery in Network Layer.	02
f. D	Define Token Bucket.	02
g. V	Vrite about Registered ports.	02
	Differentiate between connection less and connection oriented.	02
i. V	Vhat is Telnet?	02
j. D	Define Compression.	02
<u> </u>	SECTION B	
2. Att	tempt any <i>three</i> of the following: 3 x 10 =	= 30
a. D	Define TCP/IP Model in detail.	-10
b. E	Explain Noisy channel Protocols with explanation and diagram.	10
	Define IPv4 header Format in detail.	10
d. D	Define TCP features and header in detail.	10
e. E	Explain SNMP in detail.	10
	SECTION C	
3. Att	tempt any <i>one</i> part of the following:	= 10
a. N	Name and explain Network Devices on each layer of OSI Model.	10
b. [Define various topologies with diagram, features, and pros-cons.	
	verme various topologies with diagram, reatures, and pros cons.	10
4. Att	tempt any <i>one</i> part of the following: 1 x 10 =	
а. Г	tempt any <i>one</i> part of the following: 1 x 10 =	= 10
a. D. B.	tempt any <i>one</i> part of the following: Define any 5 LAN standards.	= 10
a. D. b. E. 5. Att	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols.	= 10
a. E b. S	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. The tempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The tempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The tempt any one part of the following: The tempt a	= 10 10
a. D. B. S. Att. b. S. a. B. S. a.	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. Itempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: The standard of the following: The standards of the following: The standard of the following: The standards of the following: The standard of the following: The standa	= 10 10
a. D. B. S. Att. b. S. a. B. S. a.	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. The tempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The tempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The tempt any one part of the following: The tempt a	= 10 10
a. D. b. E. 5. Att a. E. b. S. a. C. a. D. a. D. a. D. a. D.	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. Itempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: Explain all Interdomain and Intradomain routings algorithms. The standards of the following: The standard of the following: The standards of the following: The standard of the following: The standards of the following: The standard of the following: The standa	= 10 10
a. D E E E E E E E E E	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. The part of the following: Explain all Interdomain and Intradomain routings algorithms. Explain all Interdomain and Intradomain routings algorithms. Explain and Perform calculations both at sender and receiver end. Explain any one part of the following: Explain how Three-way handshaking using	= 10 10 10 = 10 10 10 10 = 10
a. D. b. E. 5. Att a. E. b. S. a. C. a. C. d. D. d. D.	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. The tempt any one part of the following: Explain all Interdomain and Intradomain routings algorithms. The tempt and Perform calculations both at sender and receiver end. The tempt any one part of the following: The	= 10 10 10 = 10 10 10 10 10
a. D. b. E. 5. Att a. E. b. S. a. C. d. Att b. V. 7. Att	tempt any one part of the following: Define any 5 LAN standards. Explain all Random-Access protocols. The part of the following: Explain all Interdomain and Intradomain routings algorithms. The part of the following: The	= 10 10 10 = 10 10 10 10 10
